GEOLOGICAL JOURNAL
Geol. J. **43**: 621–622 (2008)

KEYWORD INDEX

Adarouch, 463
Adula Nappe, 33
aggregates, 552
algae, 209
Algeria, 337
amphibolite facies, 33, 525
Anti-Atlas, 59, 361
assimilation-fractional-crystallization, 582

backthrusting, 447
basin inversion, 279
Béchar Basin, 337
Belgium, 75, 197
Ben-Zireg–Zousfana Trough, 337
biostratigraphy, 209, 397, 463
biostromal barrier, 337
'black marble' of Denée, 197
blueschist, 525
blueschist facies, 33
Bolderberg Formation, 75
brachiopods, 573

C and O isotopes, 241
C.A. Matley, 605
calcareous algae, 463
calciturbidites, 151
Campanile trevorjacksoni, 542
carbonate microfacies, 307
Carboniferous, 123, 279, 307, 361, 383
Caribbean, 525, 605
Carriacou, 573
Central Alps, 33
China, 1
chitinozoans, 397
conodont biostratigraphy, 241
conodonts, 209, 261
Cretaceous, 19
crystallization conditions, 95
cyclicity, 431
C.T. Trechmann, 605

Daohugou, 1
Dasberg Event, 241
deep sea fan, 337
Devonian, 383
Diest Formation, 75
Dinantian reefs, 175
dinoflagellate cysts, 75
dolomite, 175
domino tectonics, 563
duplex, 447

Early Palaeozoic, 415
Early Permian, 487
economics, 552
Eocene, 542
Epinette Transgression, 241

facies, 383
facies development, 123
failed rift, 279
feldspar micropores, 19
Fontin Transgression, 241
foraminiferans, 209, 463
Foredeep Units, 447
fossil conservation deposit, 197
fractals, 431

gastropods, 542
geochemistry, 582
glauconite, 19
grainstone reservoirs, 175
gravel, 552
greenschist, 525

highstand shedding, 279
Hirnantian, 397
history of geology, 542, 605
homonym, 1

insect, 1
Iraq, 383
Italy, 279

Jamaica, 525, 542, 552, 563, 605
Jerada Basin, 307
Jurassic, 1

Kulm Basin, 151

Late Carboniferous, 487
limestone, 552
lithology, 383
lydites, 261

Malatya, 95
metamorphism, 525
metavolcanogenic rocks, 415
meteoric water, 19
microbial-metazoan buildup, 307
microbial-sponge buildup, 307
microfossils, 361
Milankovitch, 431
mineral chemistry, 95
mineralogical disequilibrium, 95
mingling, 95
Miocene, 75, 573
Mississippian, 123, 151, 209, 261, 463
Mississippian palaeogeography, 175
mixing, 95
Moliniacian, 197
Morocco, 59, 307, 361, 463
multi-stage garnet, 33

neotectonics, 563
Netherlands, 175
new species, 542
New Zealand, 605
North Africa, 463
North China, 487
Northern Apennines, 447
NW Poland, 123

olistoliths, 337

palaeoenvironment, 261
palaeogeography, 151, 209
Palaeontinidae, 1
Palaeozoic sub-basin, 59
palynological assemblage zones, 487
palynomorphs, 487
petrography, 582
platforms and basins, 209
polyphase deformation, 447
Pomeranian Basin, 123
power laws, 431
pre-Silesian exploration, 175
Pseudocossus, 1
Pyrénées, 261

radiogenic isotopes, 582
Rhenish Mountains, 151
rhyolite, 95
rugose corals, 209

sand, 552
sea-level variations, 151
sedimentary environments, 383
sedimentary evolution, 123
sedimentology, 151
seismic sections, 59
sequence stratigraphical model, 337
Serpukhovian, 463
shell beds, 573
SHRIMP, 415
siliceous event, 261
south Tuscan Palaeozoic, 279
southern Belgium, 175
southern North Sea area, 175
southern North Sea Basin, 75
Spain, 19
stratigraphy, 123, 431
stratotype, 397
structural style, 59
Strunian Transgression, 241
suboxic microenvironments, 19
Sudetes, 415

Tafilalt, 59
taphonomy, 573
tectonic evolution, 447
tectonic inversion, 563
tectonics, 605
tectono-sedimentary evolution, 337
tempestites, 279
Tournaisian, 361
trachyandesite, 95
transpression, 563
turbidites, 279, 361
Turkey, 95

Upper Ordovician, 397

Variscides, 415
Viséan, 197, 307, 337, 361, 463

Wales, 397
Wojcieszów Limestone, 415

Yellow Limestone Group, 542

Zircon, 415

GEOLOGICAL JOURNAL

CONTENTS

Volume 43, Issues 1–5

Issue No. 1, January 2008

A revision of Palaeontinidae (Insecta: Hemiptera: Cicadomorpha) from the Jurassic of China with descriptions of new taxa and new combinations: W. Bo, Z. Haichun, F. Yan and Z. Yutao 1

K-feldspar alteration to gel material and crystallization of glauconitic peloids with berthierine in Cretaceous marine sediments—sedimentary implications (Prebetic Zone, Betic Cordillera, SE Spain): J. Jiménez-millán and J. M. Castro 19

Structural and metamorphic evolution of the phengite-bearing schists of the northern Adula Nappe (Central Alps, Switzerland): F. Zulbati 33

Geological evolution and structural style of the Palaeozoic Tafilalt sub-basin, eastern Anti-Atlas (Morocco, North Africa): E. A. Toto, F. Kaabouben, L. Zouhri, M. Belarbi, M. Benammi, M. Hafid and L. Boutib 59

Dinoflagellate cyst stratigraphy and palaeoenvironment of the marginal marine Middle and Upper Miocene of the eastern Campine area, northern Belgium (southern North Sea Basin): S. Louwye and P. Laga 75

Mineral chemistry, crystallization conditions and magma mixing-mingling at Orduzu volcano (Malatya), Eastern Anatolia, Turkey : A. Önal. 95

Book Review 117

Issue Nos. 2–3, May 2008

Carboniferous Platforms and Basins

Editors: Markus Aretz, Hans-Georg Herbig and Ian D. Somerville

Preface: Carboniferous Platforms and Basins: M. Aretz, H.-G. Herbig and I. D. Somerville 119

Pomeranian basin (NW Poland) and its sedimentary evolution during Mississippian times: H. Matyja. 123

Early Carboniferous (Mississippian) calciturbidites in the northern Rhenish Mountains (Germany): D. Korn 151

Geological factors controlling Early Carboniferous carbonate platform development in the Netherlands: F. F. N. Van Hulten and E. Poty 175

The 'black marble' of Denée, a fossil conservation deposit from the Lower Carboniferous (Viséan) of southern Belgium: B. Mottequin 197

Biostratigraphic zonation and correlation of Mississippian rocks in Western Europe: some case studies in the late Viséan/Serpukhovian: I. D. Somerville 209

Environmental change during the Late Famennian and Early Tournaisian (Late Devonian–Early Carboniferous): implications from stable isotopes and conodont biofacies in southern Europe: S. I. Kaiser, T. Steuber and R. T. Becker 241

Age and origin of Mississippian lydites: examples from the Pyrénées, southern France: C. Randon and M. Caridroit 261

Carboniferous continental margin deposits in southern Tuscany, Italy: results from geological mapping of the geotopes Farma Valley and San Antonio Mine Area: H. Engelbrecht 279

Microbial-sponge and microbial-metazoan buildups in the Late Viséan basin-fill sequence of the Jerada Massif (Carboniferous, NE Morocco): M. Aretz and H.-G. Herbig 307

The development of the Carboniferous Ben-Zireg–Zousfana Trough in the northern part of the Béchar Basin, Western Algeria: implications for its structural evolution, sequence stratigraphy and palaeogeography: F. Z. Malti, M. Benhamou, L. Mekahli and M. Benyoucef 337

Mississippian Platform and Basin Successions from the Todrha Valley (northeastern Anti-Atlas), southern Morocco: J. R. Graham and G. D. Sevastopulo 361

Facies and depositional environments of the Devonian–Carboniferous succession of Iraq: A. Al-Juboury and A. Al-Hadidy 383

Issue No. 4, September 2008

New chitinozoans from the historical type area of the Hirnantian Stage and additional key sections in the Wye Valley, Wales, UK: T. R. A. Vandenbroucke, J. Hennissen, J. A. Zalasiewicz and J. Verniers 397

Enigmatic sedimentary–volcanic successions in the central European Variscides: a Cambrian/Early Ordovician age for the Wojcieszów Limestone (Kaczawa Mountains, SW Poland) indicated by SHRIMP dating of volcanic zircons: R. Kryza, J. Zalasiewicz and N. Rodionov 415

Quantitative tests for stratigraphic cyclicity: R. J. Bailey and D. G. Smith 431

Duplex architecture and late-orogenic backthrusting in Foredeep Units of the Northern Apennines (Italy): A. C. Feroni, N. Levi and G. Ottria 447

Late Viséan–Serpukhovian foraminiferans and calcareous algae from the Adarouch region (central Morocco), North Africa: P. Cózar, D. Vachard, I. D. Somerville, M. Berkhli, P. Medina-Varea, S. Rodríguez and I. Said 463

Late Carboniferous–Early Permian palynology of Baode (Pao-te-chou) in Shanxi Province, North China: L. Feng, Z. Huaicheng and O. Shu 487

Reply to 'Early Silurian positive $\delta^{13}C$ excursions and their relationship to glaciations, sea-level changes and extinction events: discussion' by Bradley D. Cramer and Axel Munnecke: D. K. Loydell 511

Early Silurian positive $\delta^{13}C$ excursions and their relationship to glaciations, sea-level changes and extinction events: discussion: B. D. Cramer and A. Munnecke 517

Issue No. 5, November 2008

Crustal and Biotic Evolution of the Caribbean Plate
Editor: Stephen Donovan

Professor Trevor A. Jackson: S. K. Donovan 521

Amphibolite and blueschist–greenschist facies metamorphism, Blue Mountain inlier, eastern Jamaica: R. N. Abbott Jr and B. R. Bandy 525

***Campanile trevorjacksoni* sp. nov. (Mollusca: Gastropoda) from the Eocene of Jamaica: at last, a name for the first fossil used in intercontinental biostratigraphic correlation (de la Beche 1827):** R. W. Portell and S. K. Donovan. 542

Aggregate sources and supplies in Jamaica: P. W. Scott and D. J. Harrison. 552

Some speculations on the Paleogene and Neogene tectonics of Jamaica: G. Draper 563

Generation of brachiopod-dominated shell beds in the Miocene rocks of Carriacou, Lesser Antilles: D. A. T. Harper and R. K. Pickerill 573

The geochemistry of the volcanic rocks of Canouan, Grenadine Islands, Lesser Antilles Arc: T. E. Smith, P. E. Holm and M. F. Thirlwall 582

The 'Forbidden Theory of Mountain Uplift' of Charles Taylor Trechmann (1884–1964): a tectonic theory of the 1950s in context: S. K. Donovan. 605
